COLLEGE OF  
AGRICULTURE  
& LIFE SCIENCES  
COOPERATIVE EXTENSION  
Campus Arboretum

will be removed in March due to construction.

The University is fortunate to have a rich history of research and experimentation that resulted in many interesting and exotic, arid-adapted plants on our campus. Those plants that have stood the test of time are considered proven winners for our climate - they include cold-hardy, heat- and drought-tolerant plants. *Laurus azorica* (Azores Laurel tree) is one such gem. ([read more...](#))

## Help Us Extend Our Reach!

The Campus Arboretum needs **just \$750 more** to completely fund the development of the **new mobile tree tours**. Although we currently offer self-guided tour booklets for public loan, and docent-guided tours, the mobile format will extend access of our tree tours to a much broader audience and enhance visitor navigation through the tree tours using their mobile phones!

**Can you support our mission to promote stewardship and conservation of urban trees? Please help us reach our goal by donating [here](#).** We greatly appreciate each one of our generous friends who support us at all giving levels from \$5 - \$5000!

Sincere thanks,  
Tanya Quist, Director  
University of Arizona Campus Arboretum
