

Watch our newest video Edible Landscapes Tour: Saguaro

The saguaro (*Carnegiea gigantea*) is a true icon and ecosystem staple of the Sonoran Desert. Have you ever heard of a nurse plant? Discover the relationship between saguaros and "nurse plants" in the Campus Arboretum's newest YouTube video, **Edible Landscapes Tour: Saguaro**. This quick yet informative video describes the ecological importance and growing conditions of these beautiful and mysterious giants.

This is the first video in our Edible Landscapes Tour playlist, which highlights a few species from the [original walking tour](#).
